FOR TECHNICAL ASSISTANCE CONCERNING FILTER APPLICATIONS OR CROSS-REFERENCE INFORMATION					

# VEHICLE ENGINE AND YEAR IDENTIFICATION

To identify the proper filters for a vehicle, the installer must know the make, model, year, and engine of his/her vehicle. On some vehicles it is necessary to use the VIN to determine the correct engine and/or year of manufacture. The character or characters in the parenthesis ( ) within the engine description of the application section is the engine code or codes for that particular vehicle. The drawing on this page shows the locations used for the VIN code. The chart below indicates the character location within the VIN for the engine. The model year identification chart shows the 10th character is used to represent the year.

The engine VIN code information below is valid only if the vehicle is equipped with the original engine. If the original engine has been changed or modified it is the installer's responsibility to determine the correct filter(s).

Manufacture	Year Range	Engine Identification	Manufacture	Year Range	Engine Identification
AMC	1970-80	7th	Jaguar	2000-04	8th
AMC/Eagle	1981-88	4th	Jeep (s/n-10000)	1972-74	8th
